ESR

THE UNIVERSAL MANAGER

Water-cooled dry vacuum pump ESR
with superior corrosion resistance

The ESR is perfect for medium to harsh applications with low ultimate pressure. Due to the variable pumping speeds it is for very flexible usage. Furthermore low noise level and low vibration characterize the ESR series.

BENEFITS

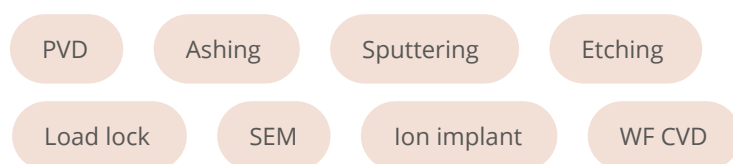

- Superior corrosion resistance
- High flexibility
- Nickel resistant
- Low vibration
- Low cost of ownership
- Low noise level

EBARA is a worldwide leading global manufacturer of vacuum and semiconductor systems used in the production of wafers, liquid crystals, solar cells and other products requiring advanced technology.

EBARA supports

EBARA Precision Machinery Europe (EPME) is part of the Japanese EBARA Group and employs approximately 150 people in Europe. The portfolio includes dry and turbo molecular vacuum pumps as well as gas abatement systems. In addition, EPME sells state-of-the-art CMP tools, wafer bevel polishing and substrate coating systems. In Europe, EPME has a central warehouse and an overhaul centre for vacuum pumps.
