

WE ARE LOOKING FOR A

# FIELD SERVICE ENGINEER

(m/f/d)

County Kildare

To prepare the expansion in Ireland.

Develop your career with us. Apply now to join us in County Kildare, Ireland. This position is permanent.

You work with the customer, local technical support team and management to prepare for the expansion of our Irish service support operations. The position requires the successful candidate to support our Electro-Plating-Systems on a 12-hour shift cycle including weekends (days only). Benefits are shift premium, health insurance and pension plan.

## YOUR RESPONSIBILITIES

You will be in charge of providing technical support of complex plants on customer's site. You are able to improve the performance of plants with engineering solutions.

- Analyse, diagnose and troubleshoot all hardware and software issues on state of the art semiconductor manufacturing equipment
- Understand and implement factory issued hardware and software upgrades
- Read and understand technical drawings, electrical schematics and P&ID drawings for the resolution of complex system issues
- Actively participate in the management and control of the spare parts in support of the Electro-Plating System
- Weekly report to both the onsite customer and local management

## WHAT WE OFFER

We offer you the opportunity to work and develop knowledge in an international environment with a secure background. We are a very well positioned, medium sized Japanese company offering the security of a solidly grown organisation and a future-proof job. We cultivate a trusting and collegial Japanese corporate culture and make our own mark on the European market with our high-tech product quality. Close relationship with our customers, focus on teamwork as well as respect are the pillars of our company values.

## YOUR PROFILE

Ideally, we are looking for applicants with solution orientated attitude and technical expertise. You are a proactive person with the following qualifications:

### EDUCATION

Bachelor's Degree (NFQ level 7) with a minimum of 2+ years' relevant maintenance experience or equivalent.

### EXPERIENCE

Mechanical, electrical and software (PLC) systems troubleshooting experience, with chemistry knowledge/experience a distinct advantage.

### SKILLS

Ability to deliver clear and concise information

Ability to follow detailed work instruction, and execute same to a high level of professional workmanship, with high attention to detail

Demonstrate a "can do" attitude

### TRAVELLING

Must be willing to travel internationally for training purposes from time to time as required

### Interested?

We are looking forward to receiving your application.:
