EBARA Participates in the Semiconductor Climate Consortium (SCC)

Semiconductor
Climate Consortium
FOUNDING MEMBER

EBARA CORPORATION (EBARA) is pleased to announce that we have decided to participate in the [Semiconductor Climate Consortium \(SCC\)](#) of [SEMI](#) as a founding member.

We agree with the vision of SCC. In the meantime, we will put our effort to reduce greenhouse gasses emitted through our business activities and reduce emissions throughout the value chain from the procurement of raw materials to our products used and disposed of by our customers. Furthermore, aiming to realize “substantially” carbon neutral, we will contribute to the absorption of greenhouse gasses using our most advanced products and cutting-edge technologies.

The EBARA Group aims to contribute to the achievement of the Sustainable Development Goals (SDGs) by addressing material issues identified in its long-term vision and executing the medium-term management plan to increase corporate value.

Looking ahead, going beyond expectations

Ahead > *Beyond*
